Professional Summary

Final-year B.Tech Computer Science student (CGPA: 8.89) with hands-on software development experience in API development, microservices, and full-stack engineering. Proven ability to write clean, well-documented, maintainable code and participate in code reviews, debugging, and iterative problem-solving. Strong foundation in Data Structures and Algorithms, object-oriented programming, and version control. Quick learner with a collaborative mindset, excellent logical thinking, and a track record of delivering production-ready solutions under mentorship.

Technical Skills

- **Languages:** C++, JavaScript (ES6+), SQL
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Design, Clean Code
- **Backend:** Node.js, Express.js, RESTful API Development, Microservices, WebRTC, Socket.IO, JWT, OAuth2
- **Frontend:** React.js, Next.js, TailwindCSS, HTML5, CSS3
- **Databases:** MongoDB, SQL, Redis
- **DevOps & Tools:** Git, GitHub, Postman, AWS (EC2), Unit Testing, Version Control, Agile/Scrum, CI/CD

Experience

Software Development Engineer Intern | ArrayLog IT Solutions Pvt. Ltd. *Feb 2026 – Apr 2026*
Key Project: Employee Management System – Node.js, Express.js, React.js, MongoDB, JWT, Nodemailer

- Collaborated with senior developers to design, develop, and test a full-stack **Employee Management System** with role-based dashboards for Admin, Manager, and Staff, covering attendance, payroll, and department management.
- Wrote **clean, maintainable, and well-documented code** following team guidelines; participated actively in **code reviews** and iterative debugging sessions.
- Built **10+ RESTful APIs** and modular backend microservices using Node.js and Express.js, reducing average API response time by **20%**.
- Implemented **JWT-based authentication** and role-based access control (RBAC) with **security best practices**, securing 3 user roles across all modules.
- Optimized **MongoDB queries and indexing** for performance reliability, improving database response time by **30%** under production load.
- Worked with QA team to **validate 50+ API endpoints** using Postman; resolved **40+ bugs** through structured debugging and root cause analysis.
- Applied **version control** best practices using Git and GitHub; followed Agile/Scrum workflows with sprint planning and daily stand-ups.

Projects

Trainify – Online Learning Management System | LINK ↗ *Oct 2024*
MongoDB, Express.js, React.js, Node.js, TailwindCSS, JWT

- Designed and developed a full-stack LMS applying **software design principles** and **OOP concepts** with role-based access for students, instructors, and admins.
- Built and documented **RESTful APIs** for course management, enrollment, and authentication workflows following **clean code** standards.
- Implemented **JWT authentication**, progress tracking, and **automated certificate generation** with modular, reusable components.

Backend Ledger – Financial Banking System *Dec 2025*
Node.js, Express.js, MongoDB, JWT, Nodemailer

- Developed a secure financial API using a **double-entry ledger system** for transaction consistency, directly applicable to **financial workflow automation**.
- Implemented **JWT authentication with token blacklisting**, idempotency handling, and **security-first** design to prevent duplicate transactions.
- Integrated **automated email notifications** (Gmail OAuth2) and applied **performance optimization** techniques for reliable data handling.

Zivro – Real-Time Communication Platform | LINK ↗ *Feb 2026*
WebRTC, Socket.IO, React.js, Node.js, Express.js

- Built a low-latency real-time video platform using **WebRTC peer-to-peer** streaming and **Socket.IO** signaling with **auto-reconnection** and fault tolerance.
- Developed a matchmaking algorithm with participant tracking, demonstrating **problem-solving** and **logical thinking** in a concurrent system.

Education

B.Tech (Final Year) – Computer Science and Engineering CGPA: 8.89/10
COER University, Roorkee, Uttarakhand 2023 – 2027

Achievements & Certifications

- **Winner – Hack-O-Holic 4.0** – 1st place; designed and deployed a full-stack solution collaboratively under time constraints, demonstrating quick learning and teamwork.
- **Winner – Manthan2k25 Hackathon** – Recognized for innovative problem-solving, logical thinking, and technical execution in a competitive multi-team environment.
- **LeetCode 100+ Day Streak** – Consistent daily practice in Data Structures & Algorithms and problem-solving
- **Generative AI Certification** – Oracle | **Technology Job Simulation** – Deloitte
