LeetCode

Professional Summary

Final-year B.Tech Computer Science student with **8.89/10 CGPA** and hands-on experience in software development, REST APIs, testing, debugging, and troubleshooting. Solved **550+ DSA problems** across LeetCode, GeeksforGeeks, and CodeStudio. Experienced with **C++, JavaScript, Node.js, Express.js, React.js, MongoDB, and SQL**, with strong foundations in **OOP, DBMS, Operating Systems, and software engineering**. Comfortable understanding requirements, writing maintainable code, resolving technical issues, and collaborating in development teams.

Technical Skills

Languages: C++, JavaScript (ES6+)
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Software Engineering: SDLC, REST API Design, Debugging, Code Review, Agile
Backend: Node.js, Express.js, JWT, Socket.IO
Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS
Tools: Git, GitHub, Postman

Experience

ArrayLog IT Solutions Pvt. Ltd. — *SDE Intern* Feb 2026 – Apr 2026

- Developed and maintained a full-stack **Employee Management System** using **Node.js, Express.js, React.js, MongoDB, JWT, and Nodemailer** supporting Admin, Manager, and Staff workflows.
- Implemented **employee, attendance, payroll, and department modules** by translating functional requirements into reusable software components.
- Built and tested **10+ RESTful APIs** and participated in debugging, troubleshooting, code reviews, and issue resolution.
- Collaborated with senior developers on **testing, documentation, and iterative development**, following coding and quality standards.

Projects

Trainify – AI-Powered Learning Management System — *MERN, JWT, Stripe, Gemini API* GitHub · Live Demo

- Developed a full-stack **Learning Management System** with **3 role-based dashboards** for students, instructors, and administrators.
- Built and documented **15+ RESTful APIs** for authentication, course management, enrollment, progress tracking, and learning workflows using modular backend architecture.
- Integrated **4 AI-powered learning features** including chatbot, doubt solver, automated quiz generation, and code review, with JWT authorization and Postman API testing.
- Improved application performance through **modular API design, reusable React components, and optimized database-driven workflows** for maintainability and efficient request handling.

Backend Ledger – Financial Banking System — *Node.js, Express.js, MongoDB, JWT, Nodemailer* GitHub

- Developed a secure financial backend using a **double-entry ledger system** to maintain transaction consistency.
- Implemented **JWT authentication, token blacklisting, and idempotency** to prevent unauthorized access and duplicate transactions.
- Designed and tested REST APIs for financial workflows and integrated automated email notifications using **Gmail OAuth2**.

Zivro – Real-Time Communication Platform — *WebRTC, Socket.IO, React.js, Node.js, Express.js* GitHub · Live Demo

- Developed a real-time video communication platform using **WebRTC peer-to-peer streaming** and Socket.IO signaling.
- Implemented matchmaking, participant session management, and real-time event handling for browser-based communication.
- Debugged client-server communication and handled connection errors and reconnection scenarios to improve reliability.

Education

COER University, Roorkee, Uttarakhand 2023 – 2027
B.Tech – Computer Science and Engineering **CGPA: 8.89/10**

Achievements & Certifications

- **Competitive Programming:** Solved **550+ DSA problems** across LeetCode, GeeksforGeeks, and CodeStudio.
- **Industry Training – HCLTech:** Completed a 30-day industry-oriented training program covering software development practices and engineering workflows.
- **Certifications:** Generative AI Certification – Oracle | Technology Job Simulation – Deloitte
