LeetCode | GeeksforGeeks

Professional Summary

Final-year B.Tech Computer Science student with **8.89/10 CGPA** and hands-on experience in **Python, SQL, PostgreSQL, ETL pipelines, REST APIs, FastAPI, and full-stack development**. Built a logistics data engineering platform involving **CSV/REST/JSON data ingestion, validation, transformation, data quality monitoring, and PostgreSQL analytics**. Strong problem-solving foundation with **550+ DSA problems** solved across LeetCode, GeeksforGeeks, and CodeStudio, along with a **1481 LeetCode contest rating**. Experienced in building **RESTful APIs, database-driven applications, authentication systems, and real-time platforms** using FastAPI, Node.js, Express.js, React.js, PostgreSQL, MongoDB, and SQL. Strong foundation in **OOP, DBMS, Operating Systems, Computer Networks, and software engineering practices**, with practical experience in Git/GitHub, testing, debugging, and API development.

Technical Skills

Languages: Python, C++, JavaScript (ES6+)

Data Engineering: ETL/ELT, Data Cleaning & Transformation, Data Validation, Data Quality Monitoring, CSV, JSON,

Backend: FastAPI, Node.js, Express.js, REST API Design, SQLAlchemy, JWT

Databases: PostgreSQL, MongoDB, MySQL

Data & Analytics: Pandas, SQL Aggregations, Joins, KPI Analytics

Frontend: React.js, TypeScript, Next.js, TailwindCSS, HTML5, CSS3

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Tools: Git, GitHub, Postman

Experience

ArrayLog IT Solutions Pvt. Ltd. Feb 2026 – Apr 2026
SDE Intern

- **Key Project: Employee Management System** – Developed a full-stack application using **Node.js, Express.js, React.js, MongoDB, JWT, and Nodemailer** with role-based workflows for Admin, Manager, and Staff.
- Collaborated with senior developers to design, develop, and test an Employee Management System covering **attendance, payroll, department, and employee management**.
- Wrote clean, maintainable, and well-documented code following team guidelines; participated actively in **code reviews, debugging, and iterative development**.
- Built **10+ RESTful APIs** and modular backend microservices using Node.js and Express.js, reducing average API response time by **20%**.
- Implemented **JWT authentication and role-based access control (RBAC)** across 3 user roles, securing application modules and user workflows.

Projects

LogiTrack – Logistics & Delivery Data Engineering Platform | **GitHub** Sep 2026

TechStack: *Python, Pandas, FastAPI, PostgreSQL, SQLAlchemy, SQL, React.js, TypeScript, REST APIs, JSON, Git*

- Designed and developed a **data engineering platform** for logistics operations that ingests multi-source data from **CSV files, REST APIs, and JSON**, processes the data through validation and transformation stages, and loads cleaned records into PostgreSQL.
- Built Python-based **ETL pipelines** using Pandas to extract, clean, normalize, validate, and transform customer, warehouse, driver, vehicle, order, and shipment datasets while identifying duplicate, invalid, and referentially inconsistent records.
- Implemented a PostgreSQL data architecture with separate **staging, core, monitoring, and analytics schemas**, using primary keys, foreign keys, unique constraints, checks, and relational dependencies to maintain data integrity.
- Developed **FastAPI REST endpoints** for dashboard KPIs, shipments, pipeline execution, data-quality errors, and multi-file CSV ingestion, exposing processed PostgreSQL data to the frontend through API-driven architecture.
- Implemented **ETL monitoring and data-quality tracking** to record pipeline runs, extracted/valid/rejected/loaded records, validation errors, execution status, and error details for debugging and operational visibility.
- Built a React-based dashboard for logistics analytics and **data ingestion monitoring**, and deployed the application using **Vercel for the frontend and Render for the FastAPI backend and PostgreSQL database**.

Trainify – AI-Powered LMS | **GitHub** · **Live Demo** May 2026

TechStack: *MongoDB, Mongoose, Express.js, React.js, Node.js, TailwindCSS, JWT, Stripe, Gemini API*

- Designed and developed a full-stack **AI-powered LMS** using the MERN stack with role-based access across **3 dashboards** for students, instructors, and admins.
- Built and documented **15+ RESTful APIs** for course management, enrollment, authentication, progress tracking, and learning workflows following modular design principles.
- Integrated **Grok API** to provide AI-powered academic tools including an AI chatbot, course-specific doubt solver, and automated quiz generation for personalized learning.
- Implemented **AI-based code review** functionality to analyze submitted code and provide automated feedback to support student learning and problem-solving.
- Integrated **Stripe Checkout** for secure paid-course enrollment, including payment processing and payment history/receipt workflows.
- Implemented **JWT authentication and role-based authorization** to secure student, instructor, and admin workflows.

Zivro – Real-Time Communication Platform | **GitHub** · **Live Demo** Mar 2026

TechStack: *WebRTC, Socket.IO, React.js, Node.js, Express.js*

- Built a low-latency real-time video platform using **WebRTC peer-to-peer streaming** and Socket.IO signaling, achieving **sub-500ms connection establishment time**.
- Developed a matchmaking algorithm with participant tracking and automatic reconnection mechanisms to improve real-time communication reliability.
- Implemented real-time event handling and communication workflows to improve **connection reliability and user experience**.

Education

COER University, Roorkee, Uttarakhand 2023 – 2027

B.Tech (Final Year) – Computer Science and Engineering *CGPA:* ***8.89/10***

- *Relevant Coursework:* Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming, Software Engineering

Achievements & Certifications

- **Competitive Programming:** Solved **550+ DSA problems** across LeetCode, GeeksforGeeks, and CodeStudio; achieved a **1481 LeetCode contest rating** with a 100+ day solving streak.
- **Industry Training – HCLTech:** Completed a 30-day industry-oriented training program covering real-world software development practices.
- **Generative AI Certification – Oracle** | **Technology Job Simulation – Deloitte**
